

MASTER OF COMPUTER APPLICATION (MCA)

BMC301: Python Programming		
Course Outcome (CO)		Bloom's Knowledge Level (KL)
At the end of course, the student will be able to		
CO 1	Interpret the fundamental Python syntax and semantics and be fluent in the use of Python control flow statements.	K ₁ , K ₂
CO 2	Express proficiency in the handling of strings and functions	K ₁ , K ₂
CO 3	Determine the methods to create and manipulate Python programs by utilizing the data structures like lists, dictionaries, tuples and sets.	K ₃
CO 4	Use OO concepts while programming in Python	K ₁ , K ₂
CO 5	Work with Python using GUI.	K ₄
DETAILED SYLLABUS		3-0-0
Unit	Topic	Proposed Lecture
I	Introduction to Python: Introduction and Basics; Setting up path Python Data Variables & Operators: Data Variables and its types, id() and type() functions, Coding Standards, Input-Output: Printing on screen, Reading data from keyboard; Control Structures: if-else, elif, Nested if, Iteration Control structures, Break, Continue & Pass.	08
II	String Manipulation: Accessing Strings, Basic Operations, String slices, Function and Methods. Lists: Introduction, Accessing list, Operations, Working with lists, Function and Methods. Tuple: Introduction, accessing tuples, Operations, Working, Functions and Methods.	08
III	Dictionaries: Introduction, accessing values in dictionaries, Working with dictionaries, Properties, Functions. Functions: Defining & Calling a function, Passing arguments to functions – Mutable & Immutable Data Types, Different types of arguments, Recursion, Scope of variables;	08
IV	Modules and Packages: User-defined modules and Standard Library: random, numpy, scipy, sys, Math Module, String Module, List Module, Date & Time Module, Regular Expressions: match, search, replace; File Handling: Introduction, File Types, Creating, Opening, Closing, Renaming, Accessing and deleting files, File pointers, File Modes, Binary files.	08
V	Exception Handling: Exception, Exception Handling, Except clause, Try? finally clause, User Defined Exceptions. Basics of Python for Data Analysis, Introduction to series and dataframes.	08
Suggested Readings: <ol style="list-style-type: none"> 1. Basin H., "Python for Beginners", New Age International Publishers. 2. Ramalho L., "Fluent Python", SPD. 3. Severance C., "Python for Everybody", SPD. 4. Brown M. C., "The Complete Reference", Mc Graw Hill. 5. Kanetkar Y. and Kanetkar A., "Let Us Python", Bpb. 6. Lutz M., "Learning Python", SPD. 		

MASTER OF COMPUTER APPLICATION (MCA)

BMC351: Python Programming Lab		
Course Outcome (CO)		Bloom's Knowledge Level (KL)
At the end of course, the student will be able to understand		
CO 1	Interpret the fundamental Python syntax and semantics and be fluent in the use of Python control flow statements.	K1, K2
CO 2	Express proficiency in the handling of strings and functions	K1, K2
CO 3	Determine the methods to create and manipulate Python programs by utilizing the data structures like lists, dictionaries, tuples and sets.	K3
CO 4	Use OO concepts while programming in Python	K1, K2
CO 5	Work with Python using GUI.	K4
<p>Programs based on the concepts of:</p> <ol style="list-style-type: none">1. Building Python Modules2. Obtaining user Data3. Printing desired output <p>Programs based on the concepts of:</p> <ol style="list-style-type: none">1. Conditional if statements2. Nested if statements3. Using else if and elif <p>Programs based on the concepts of Iteration using different kinds of loops Usage of Data Structures:</p> <ol style="list-style-type: none">1. Strings2. Lists3. Tuples4. Sets5. Dictionary <p>Program based on the concepts of User-defined modules and Standard Library (random, numpy, scipy, sys, Math Module, String Module, List Module).</p> <p>Program based on Input Output.</p> <p>Program based on exception Handling.</p> <p>Program based on Simple Data Analysis</p> <p>Program based on Pandas.</p> <p>Note: The Instructor may add/delete/modify/tune experiments, wherever he/she feels in a justified manner.</p>
